PROFESSIONAL SUMMARY

Results-driven Software Engineer with 1+ year of experience building enterprise-grade web applications across the full stack using React, TypeScript, ASP.NET Core (C#), and SQL Server. Proven ability to own end-to-end feature development, architect RESTful APIs, and deploy production systems on Microsoft Azure with CI/CD pipelines. Adept at clean code practices and cross-functional team collaboration in fast-paced Agile environments.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, C++, SQL, HTML, CSS

Frameworks & Libraries: ASP.NET Core, React.js, Redux, Axios, Bootstrap, Electron

Backend & Databases: RESTful APIs, .NET, SQL Server, MongoDB, SSMS

Cloud, DevOps & Tools: Microsoft Azure, Azure App Services, Azure Functions, Azure DevOps (CI/CD), Git, Visual Studio, VS Code, Postman, Insomnia, Swagger, Jira

Certifications: Microsoft Certified DP-700

PROFESSIONAL EXPERIENCE

MAQ Software

Noida, Uttar Pradesh, IN – Aug 2025 – Present

Software Engineer Enterprise Web Application – React, TypeScript, ASP.NET Core, C#, SQL Server, Azure DevOps

- Owned end-to-end development across frontend (React, TypeScript) and backend (ASP.NET Core, C#), delivering 10+ production features aligned with enterprise clean architecture standards.
- Designed and maintained RESTful APIs and SQL Server database objects, reducing average API response time by 20% through optimized query structures and layered service design.
- Led multi-repository integration and deployment workflows using Azure DevOps CI/CD and Git, coordinating with cross-functional teams to achieve zero-downtime releases on Azure App Services.

MAQ Software

Noida, Uttar Pradesh, IN – Jan 2025 – Jul 2025

Associate Software Engineer Captura Workflow Application – React, Electron, JavaScript, HTML, CSS

- Enhanced frontend UI components and styling in a React-based Electron desktop application, improving visual consistency across 15+ screens and accelerating user task completion.
- Identified and resolved critical UI defects by validating frontend behaviour against backend API contracts, reducing reported UI bugs by approximately 30% over the internship period.
- Refined reusable React components and applied responsive styling best practices, contributing to a measurably smoother workflow experience for end users across the application.

PROJECTS

E-Commerce Website

Jun 2024 – Jul 2024

React.js, C# .NET, Redux, Axios, Bootstrap, SQL Server

- Built a fully responsive React frontend integrated with a C# .NET backend, supporting end-to-end product browsing, cart management, and order processing workflows.
- Implemented Redux for global cart state management and Axios for API communication, improving state predictability and reducing redundant network calls by lazy-loading product data.

Weather Forecast Portal

Jan 2024 – Feb 2024

HTML, CSS, JavaScript, REST API

- Developed a real-time weather portal displaying wind speed, humidity, and rainfall across multiple locations, integrating a third-party weather API with dynamic search functionality.

EDUCATION

Bachelor of Technology, Computer Science

Nov 2021 – Jun 2025

Ajay Kumar Garg Engineering College, Ghaziabad

CGPA: 8.3
